

DFD for Radiomics Features Extraction for TCIA Images

Legend

DICOM: Digital Imaging and Communications in Medicine, the standard for storage and transmission of digital medical images. Common file extension is .dcm

TCIA: The Cancer Imaging Archive, a repository of a variety of medical image collections.

NRRD: Nearly Raw Raster Data, a file format for storing n-dim raster data. NRRD files use less total file counts and do not store patient information. Common file extension is .nrrd.

Radiomics: Qualitative features recording shape and texture information extracted from regions of interest of medical images.
